- Sunroom with New Windows

The Lakehouse on Tamarack

Perched atop a gentle hill, this charming cottage or home offers breathtaking views of the shimmering lake. A circular driveway leads you to the screened-in porch, inviting you to sit and soak in the scenery.

The cottage itself serves as a cozy haven, featuring a rustic wooden aesthetic, a welcoming JA Roby cook stove that also acts as an additional heat source, and expansive windows that capture the ever-changing beauty of nature, whether you gaze eastward toward the lake or westward at the private pond.

Tamarack Lake is a delightful, smaller body of water that prohibits motorized boats. Many cottagers prefer to use non-motorized options, like tin or pontoon boats equipped with electric motors. This policy fosters a tranquil ambiance around the lake and along its shores.

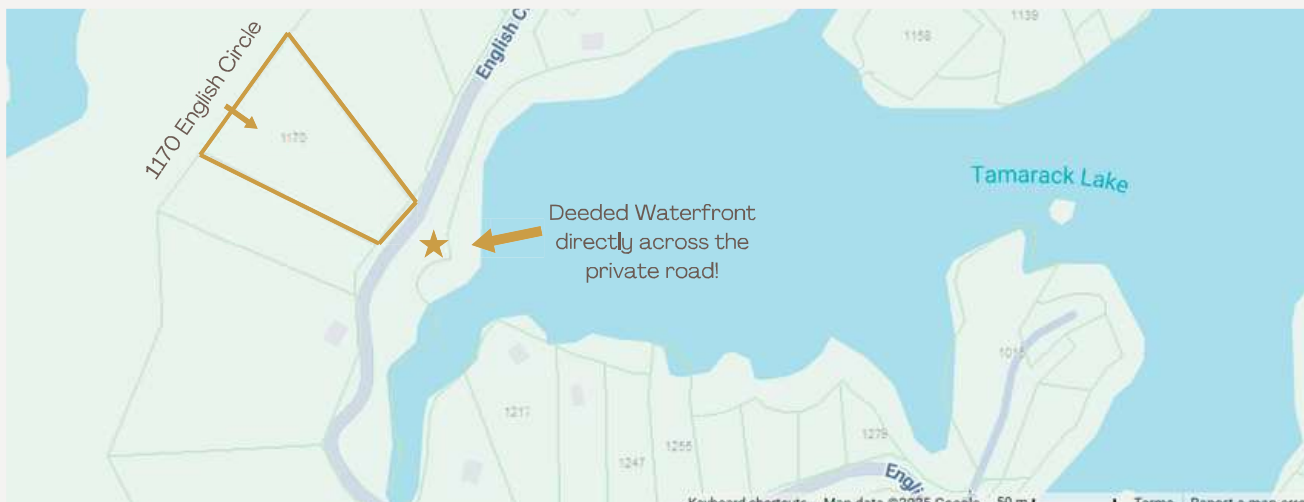

Whether you're enjoying a morning coffee at dawn or savoring a glass of wine beneath the stars, this hilltop lakehouse provides the ideal escape to relax and rejuvenate.

Waterfront Serenity
